Supplementary Fig 7: Growth curve kill assay and the corresponding phage score plot involving øEnA02 and ECC hosts, namely AH19K020 CPO020, and CPO239. The data presented in the figure reflects the performance of the trained phage on D7 vs D0. D0 represents untrained (Ancestor phage) and the host names indicate conditions where bacterial growth was observed without the phage treatment. Rep 1= replicate 1, Rep2 = replicate 2
